

Select LMI Products

Full Turn-key Operator Cabs

LMI Cabs are custom built assemblies to your requirements. They include painted weldments, sealed windows, wiper systems, seating, lighting, sound-proofing, HVAC controls, operator interfaces, power conditioning and all control panels, electronics and harnessing. Increased integration and 100% testing ensures highest quality and rapid installation.

Packaged Electro-Mechanical Solutions

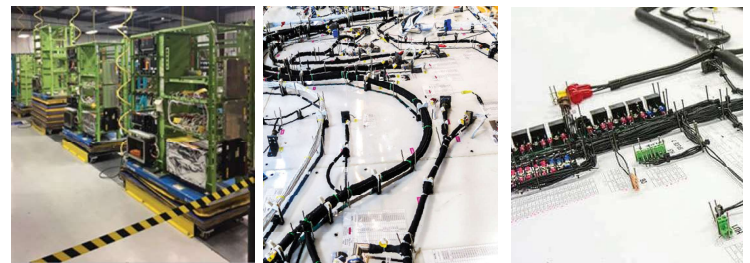

We will work with your engineering team and commodity buyers to develop or redesign your electro-mechanical sensor, control, and interface components. Custom LMI Solutions & Innovations are ideal for new programs as well as affordable replacement strategies for legacy service products that may be phasing out of production but still have market demand.

Instrument Clusters and Dashboards

Customized & made from durable, heavy-gauge polycarbonate material. Custom placards use thin-gauge polycarbonate material with reverse printing/silk-screening for reliable long-term wear and scratch resistance in harsh environments. We install any combination of gauges, switches, back-lighting, audible/visual alarms, harnesses and electronic controls.

Control Panels, Logic and J-Boxes

LMI control panels, logic and j-boxes can be customized in any size or shape to your specifications. They are configured for applications such as operator interface consoles, power distribution centers, junction box assemblies, or for engine/hydraulic controls interface. They are designed and manufactured for use in rugged environments and tested to your requirements.

Wire Harnesses & Cable Assemblies

From simple to complex harnesses, LMI offers high quality assemblies for all applications with a full line of terminals and connectors such as Tyco, Delphi, Molex and more. Our capabilities include RF/Coax Phased Mat Sets, machine braiding, application of sleeving for abrasion protection, variety of shielding and heatshrink coverings, pull & pressure testing and 100% electrical testing for insulation, shorts, resistance, capacitance, and IPC-620 qualified.

A Trusted Manufacturer Since 1948

Lmi aerospace

SONACA GROUP

LMI Aerospace is a trusted manufacturer of high quality electrical, electronic, and mechanical systems and products. We bring innovative solutions to exceed customer expectations while our reputation for reliability, performance, and on-time deliveries is unmatched in our industry.

Since 1948 we have delivered technical expertise and products for a variety of specialized industries, including construction, railroad, transit, automotive, aerospace, hospitality, defense-military, food & beverage and medical.

Quality registrars, ISO 9001, AS 9100, IPC-620 Qualified
